RE: docket #98P-1194.

Dear FDA:

I write supporting the Center for Food Safety's lawsuit calling for the removal of r-BGH from the market given the health concerns surrounding its use, which concerns have been supported by research that suggests it may contribute to public health risks.

While a safe substance that would increase milk production is desirable, this is not that substance. Other countries have opposed approval. We need to join them.

The health of American citizens must be given higher priority than the profit of milk producers and distributors.

Please remove r-BGH from the market.

Sincerely,

A handwritten signature in black ink, appearing to read 'William Miller', with a horizontal line drawn through it.
